

## PRODUIT DE SANTÉ NATUREL

### HUILE DE POISSON

La présente monographie vise à servir de guide à l'industrie pour la préparation de demandes de licence de mise en marché (DLMM) et d'étiquettes dans le but d'obtenir une autorisation de mise en marché d'un produit de santé naturel. Elle ne vise pas à être une étude approfondie de l'ingrédient médicinal.

Il existe plusieurs acides gras polyinsaturés *N*-3, mieux connus sous les noms d'acides gras omega-3/acides gras  $\omega$ -3 (Ph.Eur. 2023). Cette monographie est spécifique à l'acide eicosapentaénoïque (C20:5 n-3; AEP) et à l'acide docosahexaénoïque (C22:6 n-3; ADH).

#### Notes

- Cette monographie appuie uniquement les acides gras qui se trouvent naturellement dans l'huile de poisson avec à la fois de l'AEP et de l'ADH. Les huiles de poissons peuvent être concentrées mais pas enrichies avec des acides gras supplémentaires.
- Les parenthèses contiennent des éléments d'information additionnels ( facultatifs) qui peuvent être inclus dans la DLMM ou sur l'étiquette du produit à la discréTION du demandeur.
- La barre oblique (/) indique que les termes et/ou énoncés sont synonymes. Le demandeur peut utiliser n'importe lequel des termes ou énoncés indiqués.

**Date** 28 mars 2024

#### Nom(s) propre(s), Nom(s) commun(s), Information(s) d'origine

Tableau 1. Nom(s) propre(s), Nom(s) commun(s), Information(s) d'origine

Nom(s) propre(s)	Nom(s) commun(s)	Information(s) d'origine	
		Matière(s) d'origine <sup>1</sup>	Partie(s)
Huile de poisson	Huile de poisson	<ul style="list-style-type: none"><li>• Ammodytidae</li><li>• Carangidae</li><li>• Clupeidae</li><li>• Engraulidae</li><li>• Gadidae<sup>2</sup></li><li>• Osmeridae</li><li>• Salmonidae</li><li>• Scombridae</li></ul>	En entier

Références: Nom propre: BP 2023, Ph.Eur. 2023; Nom commun: BP 2023, Ph.Eur. 2023; Informations d'origine: BP 2023, Ph.Eur. 2023, Froese et Pauly 2022.

<sup>1</sup> Correspond à l'huile du corps entier d'un ou plus d'espèces des familles listées dans le Tableau 1 dans

sa forme naturelle, et/ou sous forme triglycéride/triacylglycérol concentrée et/ou sous forme estérifiée concentrée (BP 2023; Ph.Eur. 2023; Froese et Pauly 2022). Les noms communs des espèces et non pas les familles peuvent être listés sur l'étiquette.

<sup>2</sup>Pour les huiles de poisson incluant des espèces de Gadidae comme matière d'origine, le contenu en vitamine A et D doit être testé afin d'assurer que les doses maximales quotidiennes rencontrent la monographie des Suppléments de multivitamines/minéraux pour chaque groupe d'âge.

## Voie d'administration

Orale

## Forme(s) posologique(s)

Cette monographie exclut les aliments et les formes posologiques semblables aux aliments tel qu'indiqué dans le document de référence Compendium des monographies.

### Formes posologiques acceptables par groupe d'âge:

**Enfants 1-2 ans:** Les formes posologiques acceptables se limitent à l'émulsion/suspension et aux solutions/préparations liquides (Giacoa et al. 2008; EMA/CHMP 2006).

**Enfants 3-5 ans:** Les formes posologiques acceptables se limitent aux formes à croquer, à l'émulsion/suspension, aux poudres et aux solutions/préparations liquides (Giacoa et al. 2008; EMA/CHMP 2006).

**Enfants 6-11 ans, Adolescents 12-17 ans, et Adultes 18 ans et plus:** Les formes posologiques acceptables pour la voie d'administration orale sont indiquées dans la liste déroulante dans le formulaire web de demande de licence de mise en marché pour les demandes officielles.

## Usage(s) ou fin(s)

*Produits fournissant de 100 à 5 000 mg d'acide eicosapentaénoïque (AEP) et d'acide docosahexaénoïque (ADH), par jour*

- Source d'acides gras oméga-3 pour le maintien d'une bonne santé (EFSA 2012; Simopoulos 2007; Oh 2005; IOM 2002; Simopoulos 1999).
- Source d'acide eicosapentaénoïque (AEP) et d'acide docosahexaénoïque (ADH) pour le maintien d'une bonne santé (EFSA 2012; Simopoulos 2007; Oh 2005; IOM 2002; Simopoulos 1999).

*Produits fournissant de 150 à 5 000 mg d'AEP et d'ADH, y compris au moins 100 mg d'ADH, par jour*

- Aide à soutenir/maintenir la santé cognitive (EFSA 2012; van de Rest et al. 2008; Freund-

- Levi et al. 2006; Fontani et al. 2005a,b; Haag 2003; Morris et al. 2003; IOM 2002).
- Aide à soutenir/maintenir les fonctions cérébrales (EFSA 2012; van de Rest et al. 2008; Freund-Levi et al. 2006; Fontani et al. 2005a,b; Haag 2003; Morris et al. 2003; IOM 2002).

*Produits pour les enfants jusqu'à 12 ans et fournissant de 200 à 2 000 mg d'AEP et d'ADH, y compris au moins 150 mg d'ADH, par jour*

Aide à soutenir/maintenir le développement (sain) du cerveau/(et), des yeux/(et) des nerfs chez les enfants jusqu'à 12 ans (Marszalek et Lodish 2005; Haag 2003; IOM 2002; Giedd et al. 1999; Mills 1999).

*Produits fournissant de 200 à 5 000 mg d'AEP et d'ADH, par jour*

- Aide à soutenir/maintenir la/une santé cardiovasculaire/du cœur (normale) (EFSA 2012; Oh 2005; Wang et al. 2004; Leaf et al. 2003; Kris-Etherton et al. 2002).
- Aide à soutenir/maintenir une/les fonction(s) cardiovasculaire(s)/du cœur (normale(s)) (EFSA 2012; Oh 2005; Wang et al. 2004; Leaf et al. 2003; Kris-Etherton et al. 2002).

*Produits fournissant de 1 000 à 5 000 mg d'AEP et d'ADH, par jour*

- Aide à réduire (les taux de)/(les) triglycérides/triacyglycérols (sanguins) (EFSA 2012; Oh 2005; Balk et al. 2004; Hooper et al. 2004; Nilsen et al. 2001; Sirtori et al. 1998).
- Aide à soutenir/maintenir les taux normaux de triglycérides/triacyglycérols (sanguins) (EFSA 2012; Oh 2005; Balk et al. 2004; Hooper et al. 2004; Wang et al. 2004; Leaf et al. 2003; Kris-Etherton et al. 2002; Nilsen et al. 2001; Sirtori et al. 1998).

*Produits pour les adultes et fournissant de 2 800 à 5 000 mg d'AEP et d'ADH, par jour et présentant un ratio AEP:ADH entre 0,5:1 et 2:1*

Utilisé de pair avec un traitement conventionnel, aide à réduire la douleur causée par l'arthrite rhumatoïde chez les adultes (EFSA 2012; Volker et al. 2000; Sköldstam et al. 1992).

*Produits fournissant de 1 500 à 5 000 mg d'AEP et d'ADH, y compris au moins 1 000 mg d'AEP, par jour*

Aide à promouvoir un bon équilibre de l'humeur (EFSA 2012; Nemets et al. 2006; Sontrop et Campbell 2006; Fontani et al. 2005a,b; Zanarini et Frankenburg 2003; Peet et Horrobin 2002; Stoll et al. 1999).

**Note :** Les usages ci-dessus peuvent être combinés sur l'étiquette du produit (par ex., Aide à réduire les triglycérides et à maintenir la santé cardiovasculaire).

## Dose(s)

### Sous-population(s)

Tel que spécifié ci-dessous.

### Quantité(s)

Méthode de préparation: Huile fixe normalisée

En plus de la quantité d'huile de poisson, l'activité doit être exprimée en quantité (milligrammes) et/ou en pourcentage (%) d'AEP et d'ADH (% poids/poids) par rapport à la quantité totale d'huile de poisson.

Tableau 2. Doses quotidiennes d'acide eicosapentaénoïque (AEP) et d'acide docosahexaénoïque (ADH) dans l'huile de poisson.

Sous-population(s)		AEP + ADH (mg/jour)	
		Minimum <sup>1</sup>	Maximum <sup>2</sup>
Enfants	1 à 8 ans	100	1 500
	9 à 11 ans	100	2 000
Adolescents	12 à 13 ans	100	2 000
	14 à 17 ans	100	2 500
Adultes	18 ans et plus	100	5 000

<sup>1</sup>Certaines restrictions aux doses minimales peuvent s'appliquer selon la section des usage(s) ou fin(s) ci-dessus.

<sup>2</sup>La dose maximale adulte d'AEP + ADH est appuyée par US FDA 2019 et EFSA 2012. Les doses maximales pour enfants et adolescents, sont calculées à partir d'une fraction de la dose adulte, dépendent du poids corporel et de l'apport calorique.

### Mode(s) d'emploi

Énoncé non requis.

### Durée(s) d'utilisation

Énoncé non requis.

## Mentions de risque

### Précaution(s) et mise(s) en garde

*Douleur causée par l'arthrite rhumatoïde*

**Consultez un praticien de soins de santé/fournisseur de soins de santé/professionnel de la santé/médecin/docteur si** les symptômes s'aggravent.

*Équilibre de l'humeur*

**Consultez un praticien de soins de santé/fournisseur de soins de santé/professionnel de la santé/docteur/médecin avant l'utilisation si** vous avez des troubles psychologiques tels que l'anxiété ou la dépression.

### Contre-indication(s)

Énoncé non requis.

### Réaction(s) indésirable(s) connue(s)

Énoncé non requis.

## Ingédients non médicinaux

Doivent être choisis parmi ceux de la version actuelle de la Base de données des ingrédients des produits de santé naturels (BDIPSN) et respecter les restrictions mentionnées dans cette base de données.

## Conditions d'entreposage

Doivent être établies conformément aux exigences décrites dans le *Règlement sur les produits de santé naturels*.

*Tous les produits, sauf ceux encapsulés*

Réfrigérer après ouverture (Wille et Gonus 1989).

*Tous les produits (information pour l'industrie; pas pour l'étiquetage)*

À être emballé dans un contenant hermétique à l'abri de la lumière (Ph.Eur. 2023; USP-NF 2023).

## Spécifications

- Les spécifications du produit fini doivent être établies conformément aux exigences décrites dans le Guide de référence sur la qualité des produits de santé naturels de la Direction des produits de santé naturels et sans ordonnance (DPSNSO).
- L'ingrédient médicinal doit être conforme aux exigences mentionnées dans la BDIPSN.
- Les niveaux de peroxyde, d'anisidine et les niveaux totaux d'oxydation de l'huile de poisson et des dérivés d'acides gras oméga-3 provenant de l'huile de poisson doivent respecter les normes établies par l'Association of Analytical Community (AOAC) et/ou les méthodes analytiques des pharmacopées. Ces spécifications assureront la résistance à l'oxydation de l'huile de poisson et des acides gras oméga-3 provenant de l'huile de poisson (SC 2015). Le niveau maximal de l'indice de peroxyde (IP) doit être 5 mEq/kg, le niveau maximal de l'indice d'anisidine (IA) doit être 20 tandis que le niveau maximal du total d'oxydation doit être 26 (calculé selon la formule : 2 X IP + IA).
- Les dioxines polychlorodibeno-para-dioxines (PCDD) et polychlorodibenzofuranes (PCDF), les polychlorobiphényles de type dioxine (PCBTD) et les polychlorobiphényles (PCB) sont des contaminants présents dans les huiles marines. Des analyses pour détecter ces contaminants sont obligatoires. Tel que mentionné dans le Guide de référence sur la qualité des produits de santé naturels, il convient d'utiliser des méthodes d'analyse appropriées, comme la méthode n° 1613 (révision B) pour les PCDD et les PCDF et la méthode no 1668B pour les congénères de biphényles chlorés de l'EPA. Pour plus d'information, il est conseillé aux titulaires d'une licence de mise en marché de consulter les documents de la Commission européenne sur les dioxines et les PCB de type dioxine dans les huiles marines. Consultez le Guide de référence sur la qualité des produits de santé naturels pour obtenir plus d'informations sur les limites acceptables de dioxines et de PCB de type dioxine.
- Pour les huiles de poisson incluant des espèces de Gadidae comme matière d'origine, le contenu en vitamine A et D doit être testé afin d'assurer que les doses maximales quotidiennes rencontrent la monographie des Suppléments de multivitamines/minéraux pour chaque groupe d'âge.

## EXEMPLE D'INFO-PRODUIT :

Veuillez consulter la ligne directrice, [Étiquetage des produits de santé naturels](#) pour plus de détails.

<b>Info-Produit</b>	
<b>Ingédient médicinal</b> dans chaque capsule	
Huile de poisson (saumon de l'Atlantique; sardine, thon - en entier)	XX mg
Fournissant YY mg d'acide eicosapentaénoïque (AEP); ZZ mg d'acide docosahexaénoïque (ADH)	
<b>Usages</b>	
<ul style="list-style-type: none"> <li>Utilisé de pair avec un traitement conventionnel, aide à réduire chez les adultes la douleur causée par l'arthrite rhumatoïde.</li> <li>Aide à promouvoir un bon équilibre de l'humeur.</li> </ul>	
<b>Mises en garde</b>	
<b>Si applicable<sup>1</sup> :</b> <b>Allergènes:</b> allergène alimentaire, gluten (source de gluten), sulfites <b>Contient de l'aspartame</b>	
<b>Consultez un praticien de soins de santé avant l'utilisation si</b> vous avez des troubles psychologiques tels que l'anxiété ou la dépression. <b>Consultez un praticien de soins de santé si</b> les symptômes s'aggravent <sup>2</sup> .	
<b>Mode d'emploi</b>	
Adultes 18 ans et plus : • Prendre X capsule(s), X fois par jour.
